

## FREQUENTLY ASKED QUESTIONS (FAQ)

Parents everywhere want to know more about the Common Core State Standards. Below, you will find some frequently asked questions and answers about the standards. Please contact your child's teacher or principal to learn more about your school's work with the Common Core.

### **Q: What are the Common Core State Standards?**

**A:** The Common Core State Standards show what students in Pre-K through 12<sup>th</sup> grade should know and be able to do in English language arts and mathematics. The standards will help all students across the State learn the same skills. This will make sure that they are ready for college and careers. The standards include changes, or "shifts," in how teachers teach to help children succeed in the topics and skills that matter most. The standards are designed to help all young people get prepared for college and careers.

### **Q: Does having common standards mean everyone will learn less?**

**A:** No. The Common Core State Standards have been built from some of the best standards gathered from States across the country, as well as from other nations and extensive research on what's needed to succeed in jobs and higher education. The Common Core standards ask teachers and students to dig deeper into the core skills and concepts for each grade level. This means that students will learn much *more* about *fewer* topics. It also means that teachers will have more time to cover subjects in greater detail. This gives students an opportunity to really understand what is being taught.

### **Q: Do the standards tell teachers how to teach?**

**A:** No. They are a tool to help teachers prepare the best classroom lessons and activities. The standards also help students and parents by showing them what it takes to be successful in each grade level. They are an important roadmap for teachers, students and parents.

### **Q: How were the standards developed?**

**A:** Forty-six states brought together experts, teachers and researchers to write the Common Core State Standards, along with almost 10,000 comments and suggestions. Connecticut adopted them in 2010. The standards are well-matched for our classrooms and will help our students learn more. Please visit <http://corestandards.org/the-standards> to read the full set of standards.

### **Q: Will this mean more tests?**

**A:** No. The Common Core State Standards do not mean more tests. But there will be different, and better, tests. In April 2013, the Connecticut will administer practice tests aligned to Common Core knowledge and skills. The feedback from this assessment will support district improvement efforts and the administration of these bridge assessments will support your district as we transition to new assessments. These new tests will reflect the changes, or "shifts," in the standards and ensure that students can meet grade-level expectations.

### **Q: Will these new tests be harder?**

**A:** At first, the new tests may seem more difficult. This is normal. The new tests will be based on the "shifts" in the standards. Over time, students and teachers will adjust to the clear expectations. There also is a possibility that student test scores could drop in the first or second year of the new tests. However, the tests are an important tool for improving student achievement. The new tests will help principals and teachers identify those students who might need extra support to successfully move on to the next grade level.

**Q: What does this work mean for students with disabilities and English language learners?**

**A:** The standards will help teachers have more time to cover subjects in greater detail. This gives students an opportunity to really understand what is being taught. There is a clear guide for applying the standards to English language learners and students with disabilities. Also, all states will be working together to constantly improve upon these issues. This will result in a strong support system for all learners.

**Q: What will the Common Core State Standards mean for students across the country?**

**A:** The standards set clear expectations for student learning across the country. In the past, every State had its own set of different academic standards. This meant that U.S. students were learning different skills and concepts at different rates. The Common Core State Standards give *all* Connecticut students an equal opportunity to learn the same high standards. This leads to a greater chance of success in college, career and life.

**Q: Is the adoption of common core standards in English language arts and mathematics going to limit student access to other subject areas, such as the arts or career and technical education?**

**A:** No. CREC understands the importance that all subjects have in preparing students for success beyond high school. The clearer standards of the Common Core will actually help teachers integrate learning across subject areas. This means that students will be given lessons that bring together mathematics, science, social studies, English language arts and other subjects.

**Glossary:**

- Shift – A change in how teachers teach and how students learn
- Text – Any written work
- Non-fiction – Texts about real-life events or facts
- Evidence – Bits of proof from the text
- Arguments – How students to convince someone of something
- Judgment – A student’s conclusion about what they have read
- Focus – Learning more on fewer topics
- Speed and Accuracy – How quickly a student can solve math problems correctly
