The Leadership Challenge is a nationally-recognized training program that draws on the extensive research of Jim Kouzes and Barry Posner. This two-day training session approaches leadership as a measurable, learnable, and teachable set of behaviors, covering the five practices of exemplary leadership and how these practices can enhance the ability to lead. The training session requires prior completion of an online inventory that provides insight and feedback from participants and their supervisors, co-workers, and direct reports.

Participants will:
• Identify their individual strengths and areas that need improvement
• Learn the importance of credibility and the importance of living fundamental values
• Learn how to inspire others around a common vision of the future
• Identify and try new approaches that are needed for growth
• Learn how to build collaboration, teamwork, and trust to help others excel
• Learn how to value and recognize the accomplishments of others
• Learn how to apply leadership practices to a current work challenge
