

## **Community Relations**

### **Educational Foundations**

The Council is committed to maintaining excellence in education and pursuing resources to enhance educational opportunities for all students.

The Council recognizes that members of the community are often willing to make voluntary contributions that will provide needed additional funds and resources for CREC schools and programs. The Council, therefore, approves and encourages the creation of an independent educational foundation to actively raise funds and provide resources that will enhance educational opportunities for CREC students.

CREC desires to work cooperatively with the foundation in determining the purpose for which funds may be used to meet the changing needs of its students.

The Council supports foundation allocations that serve the students of the CREC schools/programs equitably. Projects will be distributed among the schools/programs.
