

## **New Construction**

### **Concepts and Roles in Planning for Educational Facilities**

It shall be the policy of the CREC Council to plan for facilities. A Comprehensive Long Range Facilities Plan (CLRFP), including a capitol replacement plan, shall be maintained as the instrument for determining the need for new facilities or for major facility improvements. The CLRFP shall be updated annually. The CLRFP will incorporate local demographics, community use of educational facilities, projected enrollments, local educational philosophies and policies, existing and planned educational programs, and existing facilities as needed.
