

East Hartford-Glastonbury Elementary Magnet School, Glastonbury CT

Developed educational specifications, provided project management services for a new elementary magnet school in the Town of Glastonbury. The project consists of a new one story elementary school with a 40' diameter planetarium with a budget of \$36,724,250. Services provided include site location, site acquisition, managing the design process, preparing and submitting all required (DCS) submissions, coordinating design team and local approving authorities, budget control, oversight of the construction process, preparation of RFP's for design team and appropriate professional consultants. Additionally, CREC managed the transfer of the project from East Hartford to Glastonbury through DCS requirements and the State Legislation.
