

International Magnet School, South Windsor, CT

At the International Magnet School for Global Citizenship, students in PreK-Grade 5 discover the interconnectedness of the world through the arts, foreign language and multicultural education. The focus on the whole child prepares students to be successful 21st century citizens who understand the impact of “one” on an ever-changing society. IMS is fully authorized as an International Baccalaureate (IB) School for the Primary Years. The school's emphasis is on our Learner Profile, a set of attributes designed to create internationally minded students who have developed the skills to flourish as learners anywhere in the world. As the Program Manager, we developed the educational specifications, working collaboratively with the educators, assuring that the curricular needs of the school program were properly addressed. In addition, we developed all aspects for the grant application. As part of our role, we oversaw the pre-construction process, and are currently overseeing the construction phase.

Size:	63,000 SF
Project Budget at Start:	31.6 million
Project Budget at Completion:	31.6 million/in progress
Schedule:	2010-2014
Anticipated Completion Date at Start:	August 2013
Type of Owner Agreement:	Program Manager
